

**SUB PLANS – 12/04/2019**  
**JESSICA LAUNIUS**  
**jlaunius@arcolaschools.com**

**ALGEBRA I – Period 2 \*\*THIS CLASS IS IN ROOM 87 BY THE LIBRARY**

Students have a work day on writing equations of parallel and perpendicular lines. We learned this material yesterday, and they are to apply it today. The assignment is posted to the class website. Please encourage students to try to reach 100% on this section. **Extra credit** will be granted to students who reach 100%.

**MATH IV – Periods 3 and 7**

Notes for today will be posted to the class Google Drive. Students should locate the PDF version of the notes for some help with the problems. Students are then to complete the assignment. Encourage them to read the directions. They are to complete these problems using the assigned identities. **Extra credit** is available if students read the details on the website.

**ALGEBRA II – Periods 4, 5, and 9**

Students will pause in their regularly scheduled work to practice SAT material. The next lesson is difficult for them to learn on their own, and I apologize for being out sick. Instead, students can find a packet of PSAT questions linked to the class website. They are to complete the first 27 multiple choice problems. They may work independently or together. I will give them the answers tomorrow.

**CALCULUS – Period 8**

Students have a workday on 3.3 material. They are to work individually on a Kahoot challenge first. They may retake this challenge if they do not succeed the first time. Encourage students to try using the app instead of the website. They may have to wait while it downloads. Once they've succeeded in the Kahoot challenge, they have a few problems from a worksheet posted to the class website.
